

**TABLE 1: TOTAL AMOUNT OF HAZARDOUS WASTES AND OTHER WASTES
GENERATED IN 1998 (as reported by Parties)**

Country	Quantity (metric tonnes)
Austria ¹⁾	972,062.000
Bahrain	140,000.000
Bulgaria	547,800.000
Canada ²⁾	5,900,000.000
China ³⁾	9,896,261.970
Cuba	1,812,351.110
Cyprus	6,700.000
Czech Republic ⁴⁾	3,917,719.000
Denmark ⁵⁾	281,000.000
Estonia ⁶⁾	6,188,000.000
Finland ⁷⁾	480,000.000
Greece	287,000.000
Hungary ⁸⁾	3,914,978.000
Iceland	6,436.000
Indonesia	17,131.000
Ireland	296,017.000
Kuwait	92,095.000
Latvia	80,000.000
Lithuania ⁹⁾	131,496.000
Malaysia	398,508.098
Micronesia (Federated States of)	290.800
Moldova	12,858.000
Monaco	44,439.500
Morocco ¹⁰⁾	6,543,000.000
Netherlands ¹¹⁾	2,926,000.000
Nigeria	589.000
Norway ¹²⁾	650,000.000
Oman ¹³⁾	251,243.000
Poland ¹⁴⁾	1,122,477.926
Portugal ¹⁵⁾	23,570,053.000
Romania ¹⁶⁾	39,440,000.000
Russian Federation ¹⁷⁾	107,060,000.000
Slovakia	1,400,000.000
Sri Lanka ¹⁸⁾	40,617.000
Switzerland ¹⁹⁾	1,042,567.000
Thailand ²⁰⁾	1,600,000.000
Uganda	38.300
United Kingdom ²¹⁾	4,846,000.000
Uzbekistan ²²⁾	26,442,480.600
TOTAL	252,358,209.304

1)	A new list of hazardous wastes was enacted in 1998.
2)	Environment Canada completed a national inventory of hazardous waste generation for the year 1991. The inventory calculated national annual generation of hazardous waste at 5.9 million tonnes.
3)	The total amount of hazardous waste generated in 1998 was 9.74 million tons (9 896 261.97mt), of which 9.05 million tons or 92.9% of all hazardous waste, was generated by industries at the county-level and above (source: SoE 1998).
4)	Change in definition of hazardous waste since 1998.
5)	Consists of: generation from Primary Sources: 187 000mt + generation from Secondary Sources: 94 000mt. Total waste generation: 12 233 000
6)	Total amount of generated waste consist of hazardous waste 5 619 000mt + municipal waste 569 000mt. Main amount of hazardous waste (5 588 000mt) was generated in oil shale processing (ash and semi-coke).
7)	Based on the 1997 data.
8)	Total amount of hazardous wastes generated in accordance with Hungarian Legislation (Includes wastes from BC Annex I: 1 983 147mt + BC Annex II: 131 617mt).
9)	78 166mt according to the definition of the Basel Convention. 131 496mt according to the definition of the National Legislation.
10)	Sum of households wastes: 5 600 000mt + industrial wastes: 930 000mt + clinical wastes (contaminated): 13 000mt.
11)	Sum of contaminated soil: 775 000 + ship-cleaning waste: 568 000 + other hazardous wastes: 1 583 000. Figures are not yet formally laid down. Dutch definition of hazardous waste (Besluit aanwijzing gevaarlijke afvalstoffen).
12)	Approximate amount.
13)	Excludes Salalah area of Oman.
14)	Information on 1998 was prepared based on the Act on Wastes dated 27 June 1997 and in accordance with the classification of wastes (including the list of hazardous wastes) included in the Ordinance of the Minister of Environmental Protection, Natural Resources and Forestry on classification of wastes dated 24 December 1997; as a result, this information cannot be compared with data from previous years, when the Act on Environmental Protection and Management dated 31 January 1980 and daughter executive acts were in force.
15)	Consists of 3 200 000mt of industrial hazardous waste production + 24 000 000mt of estimated industrial non-hazardous waste production + 3 900 000mt of municipal waste production.
16)	Sum of household wastes: 5 440 000mt + industrial wastes: 34 000 000mt of which hazardous wastes: 2 300 000mt.
17)	Among which 250 000 tonnes of class I wastes, 2 330 000 tonnes of class II, 11 350 000 tonnes of class III and 93 120 000 of class IV.
18)	Estimated amount.
19)	The figure includes hazardous waste and special waste.
20)	For the whole country. 1 250 000 tons of industrial hazardous waste and 350 000 tons of hazardous waste generated from community.
21)	Figures are for England and Wales. Figures will be updated for whole UK when Northern Ireland and Scottish data becomes available.
22)	Includes other non-toxic wastes.
