Remarks:

Botswana	However some exports of used oil have failed to proceed to South Africa due to a new requirement by the Competent Authority. Therefore guarantees that such oils are PCB free. No facilities exist for this test at present. The issue is still under discussion with South African authorities. This issue was resolved amicably between South Africa and Botswana.
Mauritius	No such case has been reported or brought to the knowledge of the relevant authorities.
Tanzania (United Republic of)	So far the Competent Authority and Focal Point are not informed with disposal which did not proceed as intended.

Measures	

United Kingdom of Great Britain and Northern Ireland	
Countries	USA / GB
Date	11.2003
Waste	Ships
Amount (mt)	100000
Reason	Waste Management Licence for the recovery facility was deficient
Measures	Ships are currently stored at the recovery facility – The safe storage of the vessels is being delivered through strict conditions imposed by the Environment Agency to ensure that the vessels are secure, that no dismantling takes place and that no environmental risk arises during storage. The recovery facility is currently applying for the relevant licenses and permissions to enable recovery to take place at the site. These are being considered by the relevant authorities.

Remarks:

Australia	Information is not available.
Austria	The wastes were exported for permanent underground storage (D12) but not accepted due to improper packaging/preconditioning. Subsequently the wastes were returned to Austria for D14/D15.
Germany	* amount: ca 2000
Iceland	None reported.
Israel	Information is not available.
Netherlands	In 2003 no disposals which did not proceed as intended were registered.
Norway	(1) Tracking of lorry lost in Denmark. Destination supposed to be Nigeria. (2) LRA means Low Radioactivity (in materials). (3) WEEE is waste electrical and electronic equipment. LCD is liquid crystal display.
Spain	Information is not available.
Sweden	Information is not available.
