

## **BC-14/7: Technical guidelines on the environmentally sound management of waste lead-acid batteries**

*The Conference of the Parties,*

*Having considered* the invitation of the United Nations Environment Assembly, in its resolution 3/9 on eliminating exposure to lead paint and promoting environmentally sound management of waste lead-acid batteries, to consider revising the technical guidelines for the environmentally sound management of waste lead-acid batteries<sup>1</sup> regarding the application of new technologies in different aspects of environmentally sound management systems,

1. *Recalls* decision VI/22, by which it adopted the technical guidelines for the environmentally sound management of waste lead-acid batteries;
2. *Decides* to include in the work programme of the Open-ended Working Group for the biennium 2020–2021 the consideration of whether the technical guidelines for the environmentally sound management of waste lead-acid batteries referred to in decision VI/22 should be updated;
3. *Requests* the Secretariat to report on the implementation of the present decision to the Open-ended Working Group at its twelfth meeting and to the Conference of the Parties at its fifteenth meeting.
