Tunisia	Five private facilities for the treatment of oil-containing and heavy metals-containing drilling mud and wastes (from the petroleum exploration and production)	**	D9,D5	162000	No
Uganda	Kampala City Council, Landfill Site Kiteezi, Wakiso District	Landfill for non hazardous Municipal Waste	D1		No

Remarks:

Burundi Document Etude réalisée.

Morocco Morocco does not have any installation for waste disposal. Establishment of an industrial waste treatment center is in preparation. Some wastes are incinerated at the furnace of cement factories.

Seychelles Waste collection, treatment and disposal have been subcontracted out to STAR Seychelles, an affiliate of the regional company SITA. Its contract includes waste collection and management of two landfill sites on the three largest islands collection and treatment of waste oil.

Tunisia * Capacity of the two facilities together: 670,000 mt. ** Oil-waste separation. Physico/chemical treatment - neutralization – solidification – stabilization with cement prior to landfilling.

Uganda This is the only landfill site for Kampala city. An improved and expansion has been implemented. A leachate treatment plant is in place but the discharges are not yet complying with the national standards.

Sources:

Burundi *Déchets de carton d'emballageGKW/BER/BURUNDI/1842/Chap 2. Doc. Avec le concours de GKW en collaboration avec les SETEMU (Services des Techniques Municipaux).

Mauritius No treatment and disposal facility is yet in place locally for liquid hazardous wastes. Generators of such wastes are requested to safely store their liquid hazardous wastes pending a safe disposal facility is in operation. The construction of an interim storage facility for hazardous wastes for five years is expected for the near future and a hazardous waste complex comprising of pre-treatment and disposal facility is expected to be operational by 2010.

Seychelles Revised solid waste master plan.

Tunisia Ministry of Environment and Sustainable Development.

Remarks:

Bangladesh	There are large incinerators in operation in large pharmaceutical units. Detailed information of their process is not available.
Cambodia	There are two landfills. One is for solid household waste and second one is for some special industrial wastes arising mostly from garment factory. The liquid hazardous wastes are treated by a number of industrial units according to national environmental standard. Ministry of Health is responsible for disposal of hospital waste by incineration.
Cook Islands	Only the island of Rarotonga and Aitutaki have sanitary landfills but hazardous wastes are yet to be determined to be disposed in these 2 landfills.
Japan	At April 1, 2002 (the beginning of the fiscal year of 2002), the number of final disposal facilities (landfill sites) authorized by governors is 2 727. Individual list is not available.
Kazakhstan	*Sites of storing of mining wastes, tailing dumps, slime dumps, slag dumps defined by enterprise project. Classic technology of arrangement. **Burial with further object restoration. *** Different, more than 10 thousand tones/year
Kiribati	Kiribati Environment Act (1999) and Environment Regulations (2001) require all waste disposal sites to have a Pollution Control license. License conditions will specify the type of wastes to be disposed of at the site. The probable facility used for disposal which would be illegal are the Council landfills D1 but these are not treated. However the current situation is that these landfills are not to be used by people for the disposal of hazardous waste under the control of the MELAD and the South Tarawa Island Councils.
Kyrgyzstan	At present, there are 41 disposal facilities throughout Kyrgyzstan: 12 facilities are for temporary disposal, 3 facilities are for landfill and 26 are organized depots. All necessary information can be obtained from National Statistics Committee.
Pakistan	Two wastes water treatment plants i.e. Kasur Tanneries Pollution Control projects are operational in Kasur and Karachi, respectively. A number of small hospitals are operating incinerators for incineration of hospital waste. An inventory of the same, however, does not exist.
Republic of Korea	269 landfills and 5870 incinerators for household and non-hazardous industrial wastes were in operation by local governments or private companies in 2002. Private companies operated 309 incinerators and 19 landfills for specified wastes, which are considered as hazardous waste pursuant to the Waste Management Act.

Singapore	Toxic waste treatment companies are privately operated and licensed by PCD.
Sri Lanka	At present there are no authorized organizations for disposal of hazardous waste. But negotiations are being conducted. However, the Cabinet approval has been granted to seek private sector partnerships in management of hazardous waste in Sri Lanka. Preliminary arrangements are being carried out to establish a hazardous waste management facility in Sri Lanka. Industrialists treat their own waste under the Environmental Protection License. On the other hand industrialists are compelled to operate their own waste treatment plants.

Remarks:

Albania	By 2000 Ministry of Energy and Industry drew up an inventory of hazardous substances in 98 enterprises. The quantity of hazardous accumulated at industrial facilities totaled 3105 tons, of which 2115 tons are stored as obsolete chemicals and 990 tons could be used as raw materials. No measures are being taken to destroy these obsolete hazardous chemicals. In addition, about 1000 tons of obsolete pesticides have accumulated in agriculture (farms and storage).
Armenia	The “Law on Environmental Protection and Natural Resources Use Fees” was adopted in December 1998, by which state management and order of environmental protection are regulated, as well as natural resources use fees, payments and responsibility for violation are provided. In April 2000 the “Law on Environmental Protection Fee Rates” was adopted, by which the fee rates are determined for wastes disposal to the landfills depending on class of wastes hazard. The article 22 “Environmental protection fees for wastes disposal into environment” of the National “Law on Wastes” states that to dispose wastes into environment the environmental protection fees are established according to the National “Law on Environmental Protection and Natural Resources Use Fees”.
Bulgaria	A project for Establishment of the National Hazardous Waste Treatment Centre is under preparation. The import of all types of waste in Bulgaria intended to be stored, landfilled, or destined to any Annex IVA operation is prohibited.
Hungary	1* 17 for Hospital wastes 15 for Spent oil and solvents 2 for animal carcass incineration 16 for mixed hazardous waste incineration
Lithuania	The Rules of Waste Management set the order of registration of waste managers. Every enterprise engaged in waste collection, transportation, recovery and disposal activities and every enterprise commissioned by other enterprise in waste recovery and disposal, including waste import and export companies shall be registered with the Waste Managers Register. The Ministry of Environment shall administer the Waste Managers Register. The data on the waste management enterprises contained in the Waste Managers Register shall be furnished to local municipal institutions and county administrations not less than once a year. The data contained in the Waste Managers Register shall be furnished to legal or natural persons upon submitting an application stating the required information.
Republic of Moldova	As a result of a Government initiative, to date about 1700 tones of obsolete pesticides have been repackaged and stored in 21 centralized stores. The Government expects by the end of 2006 to finish the job and to repackage all obsolete pesticides in 28 centralized storages. The total amount of pesticides is now estimated to be 3000 tones.
Romania	There are also 47 landfills for hazardous wastes which are not complying with European Directive 1999/31/CE, owned by companies that generate

hazardous wastes. According with the provisions of the implementation plan for Directive 199931/CE, these 47 landfills will cease activity until 31 December 2006.

Serbia and Montenegro There are no approved and licensed facilities. Currently available legal options are temporary storage and exporting of hazardous wastes in accordance with the provisions of the Basel Convention.

Slovenia The facilities treat all kind of wastes not only hazardous and other wastes. They do not treat imported hazardous waste.

Ukraine In all these cases remaining capacity in accordance with design is exhausted. The figures indicate the total mass of stored waste.

Russian Federation	· Data Bank of Federal State Form of Statistical Control ? 2-TP (Wastes) "Data on generation, use, treatment, transportation and disposal of wastes of production and consumption" for 2004. · Regional registers of waste disposal facilities in territorial authorities of MNR of Russia.
Slovakia	Information is available from the Focal Point (landfill sites, incineration plants - databases)
Slovenia	http://www.arso.gov.si/podro~cja/odpadki/podatki/odstranjevalci.doc http://www.arso.gov.si/podro~cja/odpadki/podatki/sezig.doc The data on this web site are updated monthly.
Ukraine	There are 2 760 of such facilities in Ukraine for industrial wastes and near 700 municipal dumps, part of which are used for industrial wastes disposal, but the Focal Point has no available information on the subject yet. These data may be obtained after the inventory completion. This inventory began in 2000 in accordance with the governmental decision.

Table 2. Disposal Facilities Operated within the National Jurisdiction
2004. Latin America and The Caribbean. (Parties which did not report are not listed).

Country	Facility / Operation	Description	Disposal OP	Capacity (mt)	Treats import
Antigua and Barbuda	Cooks Sanitary Landfill National Solid Waste Management Authority (NSWMA).	Cooks Sanitary Landfill, this is mainly for municipal Solid Waste Hazardous Wastes specially engineered for HW.

Remarks:

Antigua and Barbuda

The Sanitary Landfill is designed mainly for Solid Waste.

Argentina

For information about Licences for Wastes Operators granted by Argentine Jurisdictions (local authorities), see web site:www.medioambiente.gov.ar (COFEMA)

Brazil

There are several licensed landfills, for urban and common wastes, hazardous and industrial wastes. There are licensed incineration facilities.

Cuba

The facilities have the environmental consent.

Dominica

All solid waste including hazardous waste is disposed of at landfill with gas and leachate treatment facilities. Limited separation of waste is undertaken.

Jamaica

On request, the Agency may permit the disposal of asbestos at the country's main landfill, Riverton City landfill, by entombment in concrete. The Agency does not treat or dispose of imported wastes.

Sources:

Argentina

There are several facilities in the country. For an up-dated National Permits List see web site: www.medioambiente.gov.ar (Dirección Nacional de Gestión Ambiental - Unidad Registro).

Brazil

A detailed list of these facilities can be obtained from: Directorate of Environmental Control of the Brazilian Institute of Environment and Renewable

------------------	--	--	--	--

Remarks:

Germany	In Germany about 500 authorized facilities for the treatment of hazardous waste are in operation. There is a total remaining landfill space (D1, D12) of about 135 million cubic meters but most of it will be necessary for the disposal of non-hazardous waste. There is a total capacity for biological, chemical and physical treatment or incineration on land (D1, D9) of about 8 million metric tons per year. Other methods of D-operations are not possible in Germany. In many facilities the treatment of imported waste is also possible.
Turkey	* This amount for other wastes (%20 dangerous substance). These facilities have been licensed by the Ministry of Environment and Forest for final disposal.
United Kingdom of Great Britain and Northern Ireland	There are too many facilities in the UK that are authorised to dispose of wastes to list here.
