2007 Cu Scrap	Melting	R4	39 000	No
2007 Zn Scrap	Melting	R4	571	No
2007 Al Scrap	Melting	R4	3791	No

Remarks 2007 Many scrap melting plants are in operation. Some are running at industrial scale. These are equipped with air pollution control devices. There are some cottage scale scrap melting industries as well.

At present there is no central company authorized in the country for the recovery of Hazardous waste. Industrialists have been requested to have their own waste treatment recovery plants under conditions stipulated in the Environmental Protection License scheme. Industrial Estates and Parks have Central Waste Treatment facilities. Some of the industries have been requested to have temporary storages for hazardous waste that is generated, until such time appropriate facilities are made available.

According to the requirements of the Directive 91/689/EEC on hazardous waste, the hazardous waste treatment facilities annually report (for the year 2004-2006) was send to the European Commission by the end of September 2007.

Remarks 2007 The Rules of Waste Management set the order of registration of waste managers. Every enterprise engaged in waste collection, transportation, recovery and disposal activities and every enterprise commissioned by other enterprise in waste recovery and disposal, including waste import and export companies must be registered in the Waste Managers Register (http://193.219.55.14/atir/ATIR.py/m_search). The Ministry of Environment shall administer the Waste Managers Register. The data on the waste management enterprises contained in the Waste Managers Register must be furnished to local municipal institutions and county administrations not less than once a year. The data contained in the Waste Managers Register must be furnished to legal or natural persons upon submitting an application stating the required information.
