

BC-14/19: Basel Convention Partnership Programme

The Conference of the Parties,

I

Follow-up partnership to the Partnership for Action on Computing Equipment

Recalling its decisions VI/32 on partnership with environmental non-governmental organizations and with the industry and business sectors, VII/3 on the Basel Convention Partnership Programme, VIII/2 on creating innovative solutions through the Basel Convention for the environmentally sound management of electrical and electronic wastes, VIII/5 on the Basel Convention Partnership Programme and 13/12 on the Partnership for Action on Computing Equipment,

Having regard to the Basel Declaration on Environmentally Sound Management¹ and the Nairobi Declaration on the Environmentally Sound Management of Electrical and Electronic Waste,²

Noting the rapid increase in the amount of electrical and electronic equipment used and purchased globally, which has led to an increasing volume of used and end-of-life electrical and electronic equipment, including computing equipment, which in many instances is not being managed in an environmentally sound manner,

Noting also the potential life-cycle benefits of reusing and recycling used and end-of-life electrical equipment and electronics in an environmentally sound manner, such as reducing greenhouse-gas emissions, conserving natural resources, and providing sustainable economic and social development opportunities in developing countries and countries with economies in transition,

Noting further the importance of the transboundary movement controls under the Basel Convention on the Control of Transboundary Movements of Hazardous Wastes and Their Disposal to the achievement of environmental protection,

Acknowledging that dissemination of the guidance developed by the Partnership for Action on Computing Equipment and the Mobile Phone Partnership Initiative and other relevant technical guidelines and guidance can contribute to improved implementation of environmentally sound management of end-of-life computing equipment and possibly of other end-of-life electrical and electronic equipment, in particular in developing countries and countries with economies in transition,
