

Consideration of Proposed on HS Code HS Code

Table 1 Possible HS classification for wastes listed in entry A1010

Metal wastes and waste consisting of alloys of any of the following	HS-Code	Proposed
Antimony	8110.20	May be classified as customs tariff heading 8110.20 according to Note scraps of metal that can't be used. and items made of metal that are no longer usable due to breakage, cutting, wear and tear or other of Section 15 of the Emergency Decree on Customs Tariff (No. 7) B.E. 2564.
Beryllium	8112.13	May be classified as customs tariff heading 8112.13 according to Note scraps of metal that can't be used. and items made of metal that are no longer usable due to breakage, cutting, wear and tear or other of Section 15 of the Emergency Decree on Customs Tariff (No. 7) B.E. 2564.
Cadmium	8112.61	May be classified as customs tariff heading 8112.61 according to Note scraps of metal that can't be used. and items made of metal that are no longer usable due to breakage, cutting, wear and tear or other of Section 15 of the Emergency Decree on Customs Tariff (No. 7) B.E. 2564.
Lead	7802.00	May be classified as customs tariff heading 7802.00 according to Note scraps of metal that can't be used. and items made of metal that are no longer usable due to breakage, cutting, wear and tear or other of Section 15 of the Emergency Decree on Customs Tariff (No. 7) B.E. 2564.
Thallium	8112.52	May be classified as customs tariff heading 8112.52 according to Note scraps of metal that can't be used. and items made of metal that are no longer usable due to breakage, cutting, wear and tear or other of Section 15 of the Emergency Decree on Customs Tariff (No. 7) B.E. 2564.

Table 2. Possible HS classification for wastes listed in entry A1020

Waste having as constituents or contaminants, excluding metal waste in massive form any the following	HS-Code	Proposed
Antimony; antimony compounds	2620.91	May be classified as customs tariff 2620.91 if that goods are not waste originating from the manufacture of iron or steel
	3825.10	industry and meet the criteria for use as specified in Note the appearance of mineral dross Ashes and residues used in industry for the extraction of metals or It is mainly for the production of compounds. chemistry of metals Not including ash and residue from burning municipal waste (Type 26.21) of Section 26 of the the Emergency Decree on Customs Tariffe (No. 7) B.E. 2564.
	3825.20	
	3825.30	
	3825.50	If it is another case where the goods do not qualify according to Note scraps of metal that can't be used. and items made of metal that are no longer usable due to breakage, cutting, wear and tear or other of Section 15, the waste might be classified under customs tariff headings 3825.10, 3825.20, 3825.30, 3825.50, 3825.61, 3825.69, or 3825.90. This depends on the composition, origin, and nature of utilization of that waste, taking into consideration Notes 4, 5, and 6 of Section 38 for classification purposes.
	3825.61	
	3825.69	
3825.90		

Beryllium; beryllium compounds	2620.91	May be classified as customs tariff heading 2620.91 if that goods are not waste originating from the manufacture of iron or steel
	3825.10	industry and meet the criteria for use as specified in Note the appearance of mineral dross Ashes and residues used in industry for the extraction of metals or It is mainly for the production of compounds. chemistry of metals Not including ash and residue from burning municipal waste (Type 26.21) of Section 26 of the the Emergency Decree on Customs Tariffe (No. 7) B.E. 2564. If it is another case where the goods do not qualify according to Note scraps of metal that can't be used. and items made of metal that are no longer usable due to breakage, cutting, wear and tear or other of of Section 15, the waste might be classified under customs tariff headings 3825.10, 3825.20, 3825.30, 3825.50, 3825.61, 3825.69, or 3825.90. This depends on the composition, origin, and nature of utilization of that waste, taking into consideration Notes 4, 5, and 6 of Section 38 for classification purposes.
	3825.20	
	3825.30	
	3825.50	
	3825.61	
	3825.69	
	3825.90	
Cadmium; cadmium compounds	2620.91	
	3825.10	industry and meet the criteria for use as specified in Note the appearance of mineral dross Ashes and residues used in industry for the extraction of metals or It is mainly for the production of compounds. chemistry of metals Not including ash and residue from burning municipal waste (Type 26.21) of Section 26 of the the Emergency Decree on Customs Tariffe (No. 7) B.E. 2564. If it is another case where the goods do not qualify according to Note scraps of metal that can't be used. and items made of metal that are no longer usable due to breakage, cutting, wear and tear or other of Section 15, the waste might be classified under customs tariff headings 3825.10, 3825.20, 3825.30, 3825.50, 3825.61, 3825.69, or 3825.90. This depends on the composition, origin, and nature of utilization of that waste, taking into consideration Notes 4, 5, and 6 of Section 38 for classification purposes.
	3825.20	
	3825.30	
	3825.50	
	3825.61	
	3825.69	
	3825.90	
Lead; lead compounds	2620.21	
	2620.29	
	3825.10	
	3825.20	
	3825.30	
	3825.50	
	3825.61	
	3825.69	
	3825.90	

Selenium; selenium compounds	2621.10	If it is another case where the goods do not qualify according to Note scraps of metal that can't be used. and items made of metal that are no longer usable due to breakage, cutting, wear and tear or other of Section 15, the waste might be classified under customs tariff headings 3825.10, 3825.20, 3825.30, 3825.50, 3825.61, 3825.69, or 3825.90. This depends on the composition, origin, and nature of utilization of that waste, taking into consideration Notes 4, 5, and 6 of Section 38 for classification purposes.
	2621.90	
	3825.10	
	3825.20	
	3825.30	
	3825.50	
	3825.61	
	3825.69	
	3825.90	
Tellurium; tellurium compounds	2621.10	If it is another case where the goods do not qualify according to Note scraps of metal that can't be used. and items made of metal that are no longer usable due to breakage, cutting, wear and tear or other of Section 15, the waste might be classified under customs tariff headings 3825.10, 3825.20, 3825.30, 3825.50, 3825.61, 3825.69, or 3825.90. This depends on the composition, origin, and nature of utilization of that waste, taking into consideration Notes 4, 5, and 6 of Section 38 for classification purposes.
	2621.90	
	3825.10	
	3825.20	
	3825.30	
	3825.50	
	3825.61	
	3825.69	
	3825.90	

Table 3. Possible HS classification for wastes listed in entry A1030

Wastes having as constituents or contaminants any of the following	HS-Code	Proposed
Arsenic; arsenic compounds	2620.60	May be classified as customs tariff heading 2620.60 if that the goods are not waste originating from the manufacture of iron or steel industry and meet the criteria for use as specified in Note the appearance of mineral dross ash and residue containing arsenic Whether there is metal or not Type used for extracting arsenic or metals. or used for the production of chemical compounds of the said goods of Section 26 of the the Emergency Decree on Customs Tariffe (No. 7) B.E. 2564. If it is another case where the goods do not qualify according to Note scraps of metal that can't be used. and items made of metal that are no longer usable due to breakage, cutting, wear and tear or other of Section 15, the waste might be classified under customs tariff headings 3825.10, 3825.20, 3825.30, 3825.50, 3825.61, 3825.69, or 3825.90. This depends on the composition, origin, and nature of utilization of that waste, taking into consideration Notes 4, 5, and 6 of Section 38 for classification purposes.
	3825.10	
	3825.20	
	3825.30	
	3825.50	
	3825.61	
	3825.69	
	3825.90	

Mercury; mercury compounds	2620.60	May be classified as customs tariff heading 2620.60 if that the goods are not waste originating from the manufacture of iron or steel
	3825.10	industry and meet the criteria for use as specified in Note the appearance of mineral dross Ashes and residues used in industry for the extraction of
	3825.20	metals or It is mainly for the production of compounds. chemistry of metals Not including ash and residue from burning municipal waste (Type 26.21)
	3825.30	of Section 26 of the the Emergency Decree on Customs Tariffe (No. 7) B.E. 2564.
	3825.50	If it is another case where the goods do not qualify according to Note scraps of metal that can't be used. and items made of metal that are no
	3825.61	longer usable due to breakage, cutting, wear and tear or other of Section 15, the waste might be classified under customs tariff headings 3825.10,
	3825.69	3825.20, 3825.30, 3825.50, 3825.61, 3825.69, or 3825.90. This depends on the composition, origin, and nature of utilization of that waste,, taking into
	3825.90	consideration Notes 4, 5, and 6 of Section 38 for classification purposes.
Thallium; thallium compounds	2620.60	May be classified as customs tariff heading 2620.60 if that the goods are not waste originating from the manufacture of iron or steel
	3825.10	industry and meet the criteria for use as specified in Note the appearance of mineral dross Ashes and residues used in industry for the extraction of
	3825.20	metals or It is mainly for the production of compounds. chemistry of metals Not including ash and residue from burning municipal waste (Type 26.21)
	3825.30	of Section 26 of the the Emergency Decree on Customs Tariffe (No. 7) B.E. 2564.
	3825.50	If it is another case where the goods do not qualify according to Note scraps of metal that can't be used. and items made of metal that are no
	3825.61	longer usable due to breakage, cutting, wear and tear or other of Section 15, the waste might be classified under customs tariff headings 3825.10,
	3825.69	3825.20, 3825.30, 3825.50, 3825.61, 3825.69, or 3825.90. This depends on the composition, origin, and nature of utilization of that waste, taking into
	3825.90	consideration Notes 4, 5, and 6 of Section 38 for classification purposes.

Table 4. Possible HS codes for wastes listed in entry A1040

Wastes having as constituents or contaminants any of the following	HS-Code	Proposted
Hexavalent chromium compounds	2620.91	May be classified as customs tariff heading 2620.91 if that the goods are not waste originating from the manufacture of iron or steel
	3825.10	industry and meet the criteria for use as specified in Note the appearance of mineral dross Ashes and residues used in industry for the extraction of
	3825.20	metals or It is mainly for the production of compounds. chemistry of metals Not including ash and residue from burning municipal waste (Type 26.21)
	3825.30	of Section 26 of the the Emergency Decree on Customs Tariffe (No. 7) B.E. 2564.
	3825.50	If it is another case where the goods do not qualify according to Note scraps of metal that can't be used. and items made of metal that are no longer
	3825.61	usable due to breakage, cutting, wear and tear or other of Section 15, the waste might be classified under customs tariff headings 3825.10, 3825.20,
	3825.69	3825.30, 3825.50, 3825.61, 3825.69, or 3825.90. This depends on the composition, origin, and nature of utilization of that waste, taking into
	3825.90	consideration Notes 4, 5, and 6 of Section 38 for classification purposes.
