Nous sommes dans un monde industriellement développé sur les plans scientifiques et techniques. Les produits chimiques produits à travers le monde ont des conséquences néfastes pour l'environnement et la santé humaine en ce qui concerne les déchets qu'ils génèrent et aussi les effets négatifs engendrés avant ou après leur utilisation.

Au vu de tout ce qui précède, l'échange d'informations au niveau mondial en vue d'harmoniser la gestion écologiquement rationnelle dans le domaine des Conventions de Bale, Rotterdam et Stockholm est une bonne initiative.

Il ya certainement des réseaux informels de production de substances chimiques, le trafic illicite de déchets dangereux à travers le monde.

Ce qui veut dire que le Centre d'échange d'informations pourra mettre à la disposition de certains pays Parties qui ont perdu le contrôle de leurs territoires en période de crise des informations pouvant leur servir de guider si possible dans la prise de décisions en ce qui concerne les Conventions BRS.
