

Import and export control mechanisms under the Basel, Rotterdam, and Stockholm Conventions

GUATEMALA

- Mechanisms to control the import and export of chemicals
- Customs officers with no technical capabilities to identify risk chemicals.
- Basel Transboundary forms sent via email.
- Customs authority and the National Commission of Ports to coordinate administrative procedures.
- Lack of knowledge of the customs and ports officials to identify the risk

- Develop a strategy to increase raising awareness and best practices to identify the illegal traffic.
- Involve all stakeholders.

THANK YOU

GRACIAS
